

PRIMA LASER

Key cutting has been revolutionised by the innovative features of this automatic electronic key-cutting machine for mortice and bit, double bit, pin and pump keys. With just a few simple, quick operations clearly indicated on the display, Prima Laser makes it possible to work with extreme care and safety.

Prima Laser is the only key-cutting machine which reads the bitting of the key using advanced opto-electronic technologies.

- Identification of the correct position for the clamp.
- Identification of the various tip guides and their correct position.
- Control of the cutting tool speed according to keys of different thicknesses.
- Checking the correct positioning of the different types of keys.
- Checking that the selected program is the right one for each type of key.

Double bit keys	Bit keys	Pump keys

* Optional

Machine built to CE standards.

PRIMA LASER

TECHNICAL DATA

Motor:	direct current, DC
Cutting tool:	Carbide Ø 100x1,00 mm
Clamp:	rotating 360° activated by step motor
Dimensions:	Depth 780 mm - Width 580 mm - Height 785 mm
Weight:	98 Kg

AVAILABLE VERSIONS

PRIMA LASER 220V/50Hz Code D809420ZB

PRIMA LASER 110V/60Hz Code D814220ZB

PRIMA LASER 240V Code D810120ZB
